

***silco***<sup>®</sup>

# 3004 Coppex

Anti-seize lubricant

Great adhesive and moisture displacement capabilities.

Used for:

Spark plugs

Exhaust systems

Battery poles

# 3004 Coppex

Anti-seize lubricant

## Product info

Heat resistant copper grease spray offers supreme protection of moving metal parts by reducing friction – therefore enabling longevity of said parts and easier removal by next maintenance.

Broad usage allows Coppex to be applied to majority of areas that require or generate high temperatures between  $-50^{\circ}\text{C}$  and  $+1300^{\circ}\text{C}$ .

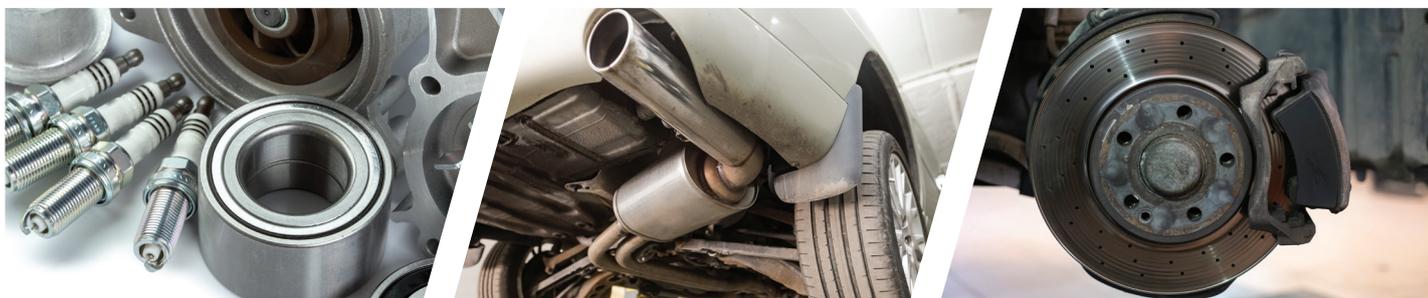

- / Effective with minimum application,
- / great electrical conductor,
- / silicone free,
- / strong adhesive power,
- / excellent anti-seize properties,
- / anti-friction material,
- / high temperature resistance from  $-50^{\circ}\text{C}$  to  $+1300^{\circ}\text{C}$ .

## How to use?

Apply a small amount on a clean surface – predominately on places with moving metal parts or electrical conductors.

**Usage possibilities: exhaust assembly, brake parts, screw connections, thread of spark plugs, battery poles, shafts...**

For further and updated information please refer to the TDS published on [www.silco.si](http://www.silco.si).

## Packaging

**3004 Coppex**  
Anti-seize lubricant
