# 9600 SFR X-Cure

UHS 420 ultra rapid clear coat

## Mixing ratio 1:1

Hardener	Standard 9650	Slow 9670
<b>Drying time*</b>		
20°C/68°F	~50 min	~60 min
60°C/140°F	~3 min	~5 min
IR	~3 min	~5 min
<b>Flash-off</b> 20°C/68°F	<5 min	<5 min
<b>Potlife</b> 20°C/68°F	60 min	60 min
<b>Thinner</b>	No thinner needed	

\*Indicative times subject to hardener type/application/environment...

## How to use?

Use of slow hardener is recommended in case of higher temperatures in combination with larger surfaces. Light half coat followed by full closed coat without flash off can be used for spot and quick repairs. For all other repairs, use two full coats application method, with max. 5 minute flash off between coats.

For further and updated information please refer to the TDS published on [www.silco.si](http://www.silco.si).

## Product info

Highly productive UHS clear coat X-Cure is characterised by outstandingly short drying times when baking (3–5 min/60°C) or when air drying (50–60 min/20°C). Polishing is possible immediately after cooling. Short drying times allow more turnover of vehicles and decreased manpower costs. Additionally, fast drying without oven baking allows fuel and electricity savings.
